**Re: Certification of Actuarial Valuation
Judges' Retirement System**

Ladies and Gentlemen:

This report summarizes the results of the actuarial valuation of the Judges' Retirement System as of July 1, 2006 performed by Buck Consultants, LLC.

The actuarial valuation is based on unaudited financial and member data provided to us by the Nebraska Public Employees Retirement System as summarized in this report. The benefits considered are those delineated in Nebraska State Statutes, effective as amended July 1, 2006.

All costs, liabilities and other factors under the plan were determined in accordance with generally accepted actuarial principles and procedures. This report fully and fairly discloses the actuarial position of the plan.

An actuarial experience analysis was last completed in parallel with the July 1, 2002, valuation. In our opinion, the assumptions represent reasonable expectations and our best estimate of the anticipated experience under the plan. A summary of the actuarial assumptions used in this actuarial valuation are shown in Exhibit 10.

Based on the results of our actuarial valuation, the Judges' Retirement System is actuarially sound. Annual funding required from the State as defined under statute for current plan members is equal to the difference between the actuarially required contribution and the total court fees, member contributions and applicable State appropriations. For the 2006/2007 fiscal year, no additional amount is due.

We are available to answer any questions on the material contained in this report, or to provide explanations to further details as may be appropriate.

Respectively submitted,

BUCK CONSULTANTS, LLC.

David H. Sliskinsky, A.S.A., E.A., M.A.A.A.

**SUMMARY OF ACTUARIAL REPORT FOR CONTRIBUTION REQUIREMENTS AND
FUNDED STATUS FOR PLAN YEAR 2006/2007**

The main purposes of this report are:

1. To determine the level of State contributions for the fiscal year ending June 30, 2008, sufficient to meet the funding policy defined under Nebraska State Statutes;
2. To review the current funded status of the system; and
3. To compare actual and expected experience under the plan during the plan year beginning July 1, 2005 and ending June 30, 2006.

The 2006 actuarial valuation is based upon the plan provisions as of July 1, 2006, as described in Exhibit 8. The actuarial methods and assumptions are described in Exhibits 9 and 10.

Highlights from the current valuation:

1. No additional State contribution is required for the 2007/2008 fiscal year. There was a change to the court fee structure in 2005 that increased the expected court fees under LB 348. Due to this change, member contributions, State appropriations, and expected court fees are sufficient to pay the total funding requirement. The system actuarial liability, net of the value of future court fees, was \$2,678,054 as of July 1, 2005. As of July 1, 2006, there is an actuarial reserve of \$1,749,801.
2. A loss was experienced on the Actuarial Value of Assets during the 2005/2006 plan year. The annual rate of return on Market Value was 10.1%. The rate of return on Actuarial Value of 6.5% fell short of the 8.0% assumed investment return rate by 1.5%, resulting in a decrease in the Actuarial Value by \$1,402,065.
3. The actuarial accrued liability decreased by \$3,671,609 as a result of decremental experience and a change in the actuarial valuation system. A decremental loss of \$43,037 was a result of salary increases that were lower than anticipated and more retirements than were expected.
4. The funded status of the system as measured by the ratio of the system assets over the Pension Benefit Obligation (PBO) increased. The PBO is calculated using the Projected Unit Credit Method, which determines the benefit by using service at the valuation date and projecting salary to assumed termination or retirement. Since the July 1, 2005 actuarial valuation, the funded percentage on Actuarial Value increased from 93.0% to 96.2%. This increase was primarily due to salary gains and the increase in court fees that were contributed.

EXECUTIVE SUMMARY

Basic Actuarial Valuation Results

The 2006 actuarial valuation results are based upon the plan provisions as of July 1, 2006 as described in Exhibit 8. The actuarial methods and assumptions are described in detail in Exhibits 9 and 10, respectively.

1. State Contribution

The State's funding policy is to contribute any additional payments necessary to meet the actuarially required contribution in excess of court fees, member contributions and other State appropriations. The actuarially required contribution is equal to the normal cost plus an amortization payment for unfunded liabilities. Unfunded liabilities created due to experience gains or losses, plan changes or assumption changes are amortized over 30 years.

Total expected funding from court fees and State appropriations for the 2006/2007 plan year is \$3,120,253. This contribution, along with expected member contributions, are expected to meet the total actuarially required funding. As a result, there is no additional State funding required for the 2007/2008 fiscal year in excess of current annual appropriations.

History of Expected Employer Contributions			
Plan Year	Additional State Contribution	Court Fees and State Appropriation	Total
2006/2007	\$ 0	\$ 3,120,253	\$ 3,120,253
2005/2006	0	2,877,273	2,877,273
2004/2005	644,562	2,074,397	2,718,959
2003/2004	0	2,691,913	2,691,913
2002/2003	726,806	564,857	1,291,663
2001/2002	0	559,256	559,256
2000/2001	0	546,082	546,082
1999/2000	0	561,406*	561,406
1998/1999	0	517,325	517,325
1997/1998	0	526,597	526,597
1996/1997	0	534,436	534,436

*Includes accrued court fees of \$41,091.

NEBRASKA PUBLIC EMPLOYEES RETIREMENT SYSTEMS
JUDGES' SYSTEM

EXECUTIVE SUMMARY

2. Asset Values

The total assets of the system as of the current and prior valuation date at both market value and actuarial value, and the rate of return during the period is as follows:

	July 1, 2005	July 1, 2006	Annual Rate of Return
(a) Market value	\$ 94,958,898	\$ 103,945,918	10.1%
(b) Actuarial value, an adjusted value intended to reduce the effect of market fluctuations (See Exhibit 1B)	\$ 94,922,714	\$ 100,565,893	6.5%

3. Actuarial Liability/(Reserve)

The actuarial liability of the system is the excess of the total benefit obligation (present value of future benefits) over the projected financial resources (sum of (i) the actuarial value of assets, (ii) the present value of future member contributions, (iii) the present value of future State appropriations, and (iv) the present value of future court fees). If the projected financial resources exceed the total benefit obligation, the system has a Reserve. The actuarial position of the system as of the current and prior valuation dates are as follows:

	July 1, 2005	July 1, 2006
(a) Present value of future benefits	\$ 122,758,815	\$ 125,536,837
(b) Actuarial value of assets	94,922,714	100,565,893
(c) Present value of future member contributions	6,613,946	6,644,755
(d) Present value of future State appropriations	333,975	288,449
(e) Present value of future court fees	<u>18,210,126</u>	<u>19,787,541</u>
(f) Actuarial Liability/(Reserve) [(a) - (b) - (c) - (d) - (e)]	\$ 2,678,054	\$ (1,749,801)

**NEBRASKA PUBLIC EMPLOYEES RETIREMENT SYSTEMS
JUDGES' SYSTEM**

EXECUTIVE SUMMARY

4. Pension Benefit Obligation (PBO)

The Pension Benefit Obligation represents a standardized disclosure measure of the present value of pension benefits payable in the future, which incorporates the effects of projected salary increases, based on service earned at the valuation date. The measure is intended to provide information regarding the Plan's funded status on an ongoing-concern basis, progress made in accumulating sufficient assets to pay benefits when due, and comparability to other plans.

Funded Status	July 1, 2005	July 1, 2006
(a) Pension Benefit Obligation		
i) retirees, disabled members and beneficiaries receiving benefits and deferred vested members not yet receiving benefits	\$ 44,971,231	\$ 50,153,771
ii) active members	<u>57,064,774</u>	<u>54,349,347</u>
iii) total pension benefit obligation	\$ 102,036,005	\$ 104,503,118
(b) Assets available for benefits (actuarial value)	<u>94,922,714</u>	<u>100,565,893</u>
(c) Unfunded Pension Benefit Obligation/(Reserve)	\$ 7,113,291	\$ 3,937,225
(d) Funded percentage on actuarial value of assets [(b) ÷ (a)(iii)]	93.0%	96.2%

NEBRASKA PUBLIC EMPLOYEES RETIREMENT SYSTEMS
JUDGES' SYSTEM

EXECUTIVE SUMMARY

5. Benefit Accrual Cost

The cost of benefits accruing over an active member's working career can be expressed as a level percentage of compensation. This cost represents the true cost of accruing benefits since it is not adjusted for any overfunding or underfunding which may exist on the valuation date. It is determined using the Entry Age Actuarial Cost Method and is also called the Normal Cost. The level benefit accrual cost determined during the current and prior valuation dates are as follows:

	July 1, 2005	July 1, 2006
(a) Benefit accrual cost amount	\$ 3,473,343	\$ 3,489,056
(b) Annual compensation before assumed normal retirement age	\$ 16,177,789	\$ 16,422,894
(c) Benefit accrual cost rate [(a) ÷ (b)]	21.470%	21.245%

6. Forecast of Disbursements

A forecast of the annual benefit disbursements expected over the next thirty years is presented in Exhibit 7. This forecast is based on the same actuarial assumptions with respect to salary increases and decrement rates used to determine the funding requirements. The forecast should be a useful guide in discussing the cash-flow needs of the system with investment managers and in projecting the future financing needs of the system.

7. Actuarial Methods and Assumptions

The required contribution developed in this report is an estimate of the amount necessary to provide ongoing benefits to plan members assuming the system is funded in a systematic manner. These estimates are based upon the actuarial method defined under State Statutes to allocate the total cost of the plan to various years and actuarial assumptions regarding the return on investments, salary rates, employee termination rates, mortality rates and other risk factors. The actuarial method used to determine the actuarial contribution requirement is the Entry Age Actuarial Cost Method.

The actuarial assumptions represent the expected long-term experience of the system on an explicit basis for each risk area considered. The experience is reviewed periodically. Where necessary, changes are recommended by the actuary and adopted by the Public Employees Retirement Board.

A summary of the actuarial methods and assumptions used in the current valuation is presented in Exhibits 9 and 10, respectively.

JUDGES' SYSTEM***

EXECUTIVE SUMMARY

8. Changes Since the Last Actuarial Valuation

Per LB 1019, Nebraska Revised Statutes Section 24-703(9) was amended such that the unfunded liability is reinitialized as of July 1, 2006 and amortized over a 30-year period. There have been no other changes in the actuarial cost method, assumptions or plan provisions since the last actuarial valuation as of July 1, 2005.

Total Change	\$ 2,467,113
Pension Benefit Obligation at July 1, 2006	\$ 104,503,118

Exhibits 9 and 10 provide a more detailed summary of the underlying actuarial methods and assumptions used in the calculations of the Pension Benefit Obligation. The benefits valued are those in effect on July 1, 2006 and 2005, respectively, as outlined in Exhibit 8. The determination of the Pension Benefit Obligation has been made in accordance with generally accepted actuarial principles and practices.

JUDGES' SYSTEM**

SUMMARY OF PLAN PROVISIONS

Member

Original

A judge who first serves prior to December 25, 1969, and who does not elect to become a Future member on or before November 1, 1981.

Future

A judge who first serves on or after December 25, 1969, or who elects to become a Future member on or before November 1, 1981.

Participation Date

Date of becoming a member.

Definitions

Final average earnings

The average of the highest three 12-month periods of covered pay, ending on the earlier of the participant's termination date or retirement date.

Fiscal year

Twelve month period ending June 30.

Member contributions

All members hired after July 1, 2004, and members that elected an enhanced Joint and Survivor Benefit under LB 1097 contribute 8% of pensionable pay up to 20 years of service, and 4% of pensionable pay thereafter. All other members contribute 6% of pensionable pay during the first twenty years of service. Such contributions are credited with interest as determined by the Statutes.

Monthly pension benefit

A monthly benefit equal to one-twelfth of 3.5% of final average salary times total years of service, subject to a maximum of 70% of final average salary. Effective July 1, 2001, an automatic annual cost-of-living adjustment (COLA) equal to the CPI-W index, with a maximum increase of 2.5% in any one year is provided for current and future retirees by LB 711. Also provided is a minimum floor benefit equal to 75% of the purchasing power of the original benefit.

Normal Retirement Date (NRD)

Attainment of age 65.

Pension service

Length of service includes all service as a Supreme Court, District Court, Worker's Compensation Court, separate Juvenile Court, County Court, Municipal Court, or Appeals Court judge in Nebraska, computed to the nearest one-twelfth year and includes declared emergency service in the armed forces.

**NEBRASKA PUBLIC EMPLOYEES RETIREMENT SYSTEMS
JUDGES' SYSTEM**

SUMMARY OF PLAN PROVISIONS

Eligibility for Benefits

<i>Deferred vested</i>	Termination for reasons other than death, disability, or retirement. No service requirement for vesting.
<i>Disability retirement</i>	Retirement by reason of permanent disability as determined by the Commission of Judicial Qualifications.
<i>Early retirement</i>	Retirement before NRD and after attaining age 55.
<i>Normal retirement</i>	Retire on NRD.
<i>Postponed retirement</i>	Retire after NRD.
<i>Pre-retirement spouse benefit</i>	Death prior to retirement.

**Monthly Benefits Paid Upon
the Following Events**

<i>Normal retirement</i>	Monthly pension benefit determined as of NRD.
<i>Early retirement</i>	Monthly pension benefit determined as of early retirement date, actuarially reduced for each month that commencement of payment precedes age 65. The actuarial reduction is based on the 1994 Group Annuity Mortality Table, 25% female, 75% male and 8% interest.
<i>Postponed retirement</i>	Monthly pension benefit determined as of actual retirement date.
<i>Termination with deferred vested benefit</i>	Members may elect to receive either (i) a refund of their contributions with regular interest, or (ii) a deferred normal retirement benefit payable at age 65 and calculated based upon service and salary at the date of termination.
<i>Disability retirement</i>	Monthly pension benefit determined as of disability retirement date.
<i>Pre-retirement spouse benefits</i>	<ol style="list-style-type: none">1) With 5 or more years of service: A life annuity is payable to the surviving spouse in the amount which would have been payable had the member retired on the date of death and elected a joint and 100% survivor annuity.2) With less than 5 years of service: A lump sum equal to the member's contributions plus regular interest.

**NEBRASKA PUBLIC EMPLOYEES RETIREMENT SYSTEMS
JUDGES' SYSTEM**

SUMMARY OF PLAN PROVISIONS

Forms of payment

All members hired after July 1, 2004, and members who elected increased contributions under LB 1097 are eligible to receive benefits paid in the normal form of an enhanced 50% Joint and Survivor Annuity. All other members receive benefits paid in the normal form of a modified cash refund annuity. Optional forms are: life annuity, life annuity with period certain, contingent annuity and joint annuity. Pre-retirement spouse benefits are payable only as described above.

Funding Arrangement

The Nebraska Retirement Fund for Judges is established in the State Treasury. The fund receives member contributions and pays benefits and expenses. Additional funds are received as follows:

Court Fees

A fee of five dollars is taxed for each cause of action in district and county courts and a fee of 10% of court costs in county courts.

State

The State makes any additional contributions that are necessary each year to pay the excess of the normal cost plus a 30-year amortization payment to fund unfunded actuarial accrued liability bases, over member contributions, court fees, and state appropriations.

State Appropriations

LB 700, passed in 1996, provided for annual cost of living increases of 0.3%, beginning in the sixth year after retirement for members ceasing employment on or after April 10, 1996. Funding for these benefits shall be made by the State into the Judges Purchasing Power Stabilization Fund (PPSF). Beginning with the 1996/1997 fiscal year, the funding equal to 1.04778% of \$6,895,000, or \$72,244, will be made for each year through the 2010/2011 fiscal year.

LB 674, passed in 1999 (effective July 1, 2000), provides for an annual cost-of-living increase equal to the CPI-W index, with a maximum of 2% in any one year, a minimum floor benefit equal to 75% of the purchasing power of the original benefit and the elimination of the Judges Purchasing Power Stabilization Fund. The existing assets in the Judges PPSF were transferred to the Nebraska Judges Retirement Fund. The State appropriation continues as defined above to the Nebraska Judges Retirement Fund through the 2010 – 2011 Fiscal Year. LB 711, passed in 2001, increased the maximum annual cost-of-living increase in any one year from 2% to 2.5%.

Benefits Reflected in Valuation

All benefits were valued, including future cost of living increases as provided for by LB 711.

Plan Provisions Effective After July 1, 2005

No future changes in plan provisions were recognized in determining the GASB 25 funded status and in determining the State's normal cost.

Changes in Plan Provisions Since the Prior Year

There have been no changes in plan provisions since the prior valuation.

NEBRASKA PUBLIC EMPLOYEES RETIREMENT SYSTEMS
JUDGES' SYSTEM

SUMMARY OF ACTUARIAL METHODS AND PROCEDURES AS OF JULY 1, 2006

A. ACTUARIAL METHODS

- 1. Calculation of Normal Cost and Actuarial Accrued Liability:** The method used to determine the normal cost and actuarial accrued liability was the Entry Age Actuarial Cost Method described below.

Entry Age Actuarial Cost Method

Projected pension and preretirement spouse's death benefits were determined for all active members under age 72. Cost factors designed to produce annual costs as a constant percentage of each member's expected compensation in each year from the assumed entry age to the assumed retirement age were applied to the projected benefits to determine the normal cost (the portion of the total cost of the plan allocated to the current year under the method). The normal cost is determined by summing intermediate results for active members under age 72 and determining an average normal cost rate which is then related to the total payroll of active members under age 72. The actuarial assumptions shown in Exhibit 10 were used in determining the projected benefits and cost factors. The actuarial accrued liability for active members (the portion of the total cost of the plan allocated to prior years under the method) was determined as the excess of the actuarial present value of projected benefits over the actuarial present value of future normal costs.

The actuarial accrued liability for retired members and their beneficiaries currently receiving benefits, active members age 72 and over, terminated vested members and disabled members not yet receiving benefits was determined as the actuarial present value of the benefits expected to be paid. No future normal costs are payable for these members.

The actuarial accrued liability under this method at any point in time is the theoretical amount of the fund that would have been accumulated had annual contributions equal to the normal cost been made in prior years (it does not represent the liability for benefits accrued to the valuation date). The unfunded actuarial accrued liability is the excess of the actuarial accrued liability over the actuarial value of plan assets measured on the valuation date. The initial unfunded actuarial accrued liability established July 1, 2004, is amortized with a level dollar payment amount over 25 years. At subsequent valuation dates, amortization bases equal to changes in the unfunded actuarial accrued liability are established and amortized with a level dollar payment over a 25-year period. The unfunded liability was reinitialized as of July 1, 2006 and amortized over a 30-year period. At subsequent valuation dates, amortization bases equal to changes in the unfunded actuarial accrued liability are established and amortized over a level dollar payment over a 30-year period. If the unfunded actuarial accrued liability is \$0 or less on the valuation date, all previous amortization bases are considered fully amortized.

Under this method, experience gains or losses, i.e., decreases or increases in accrued liabilities attributable to deviations in experience from the actuarial assumptions, adjust the unfunded actuarial accrued liability.

**NEBRASKA PUBLIC EMPLOYEES RETIREMENT SYSTEMS
JUDGES' SYSTEM**

SUMMARY OF ACTUARIAL METHODS AND PROCEDURES AS OF JULY 1, 2006

2. **Calculation of the Actuarial Value of Assets:** The actuarial value of assets is based on a five-year smoothing method and is determined by spreading the effect of each year's investment return in excess of or below the expected return. The Market Value of assets at the valuation date is reduced by the sum of the following:
- (i) 80% of the return to be spread during the first year preceding the valuation date,
 - (ii) 60% of the return to be spread during the second year preceding the valuation date,
 - (iii) 40% of the return to be spread during the third year preceding the valuation date, and
 - (iv) 20% of the return to be spread during the fourth year preceding the valuation date.

The return to be spread is the difference between (1) the actual investment return on Market Value and (2) the expected return on Actuarial Value. Effective July 1, 2000, the expected return on Actuarial Value includes interest on the previous year's unrecognized return.

3. **Calculation of Pension Benefit Obligation:** The method used to determine the Pension Benefit Obligation was the Projected Unit Credit Actuarial Cost Method without service proration. Under this method, the benefit is based on salary projected to assumed termination or retirement and service as of the valuation date.

B. VALUATION PROCEDURES

The compensation amounts used in the projection of benefits and liabilities for active members were prior plan year compensations.

In computing accrued benefits, average compensation was determined by applying the salary scale assumption to most recent compensation to construct any missing salary history.

Projected benefits were limited by the dollar limitation required by the Internal Revenue Code Section 415 as it applies to governmental plans and compensation limited by Section 401(a)(17).

The present value of future court costs were determined assuming the prior year's court costs would continue in the same amount for a period equal to the lesser of (i) 25 years, or (ii) the average future working lifetime of active members as of the valuation date (9 years as of July 1, 2006).

Changes in Methods and Procedures Since the Prior Year

Per LB 1019, Nebraska Revised Statutes Section 24-703(9) was amended such that the unfunded liability is reinitialized as of July 1, 2006 and amortized over a 30-year period. There have been no other changes in the actuarial methods or procedures since the last actuarial valuation as of July 1, 2005.
